

C-E.N.T.E.R.
"Competence, Cooperation, Communication
in the C-E.N.T.E.R. of Dissemination and Exploitation of EU Project Results"

Conference Invitation

"The Meeting of Two Continents"

EU Projects and Dissemination in Turkey

The Project: the Conference is organised by Istanbul Chamber of Commerce on behalf of the "C-E.N.T.E.R." European project (<http://www.c.enter-network.eu/>). The project is funded by the transversal action "Key Activity 4 - Dissemination and Exploitation" within the framework of the Lifelong Learning Programme and aims at developing tools and instruments in order to support EU project teams in the implementation of dissemination and exploitation activities by providing guidelines, good practice examples and by offering diverse activities for active dissemination and European exchange at transversal level. Members of the partnership are 14 organisations working in LLP and other European projects and coming from 13 different European countries.

Theme of the Conference: As being a negotiating candidate state Turkey is one of the main partners of the European Union to the pre-accession financial assistance programme. In this purpose, national agency of Turkey has been established in 2002. Also, Secretariat General for EU Affairs has been developing and implementing projects in order to inform people about the EU projects.

How can you apply an EU project? How can you find partners to realise your projects? How can you organise your projects? And how can you implement your projects? How can you disseminate your projects?

You can examine examples of good EU projects at the projects fair which is included in the conference programme.

Working language: Turkish. There will be interpretation from/to Turkish and English during conference sessions. The conference material will be available in English.

Participants: Representatives of the 14 European partner organisations in the C-E.N.T.E.R. project, Istanbul Chamber of Commerce, European Union Secretary General, Istanbul Commerce University and Informatics Association of Turkey will attend the Conference.

Furthermore, the Conference is open to anybody who is interested in, particularly bodies/subjects involved in European projects; bodies/subjects interested in European projects' development and results; bodies/subjects interested in an exchange/cooperation at European level; bodies/subjects working in the education field as well in the field of new technologies, communication or other related sectors; public/private bodies interested in creating new networks, etc.
